Hi Bernd,

Here they are.

Enjoy your own good work.

Steffen has a Mac floppy
to send it around in BOD.

and please let people copy
themselves this GHP/ICATA
proceeding.

Hope you're O.K.

see you

Theo WAMS

(Amsterdam/NL) is member the Dutch "Environment Defense" group and an expert is the field of waste management in the computer industry.

Steffen WERNERY

(Hamburg/FRG) is a computer specialist and leading member of the Chaos Computer Club. A major proponent of information openness, he has become of own experience, a specialist on official secrecy and repression as well. The ire of Philips-France, when he had entered their ill-protected system, put him behind French bars for 2½ month in 1988.

Dr. Gerard DE ZEEUW

(Amsterdam/NL) is professor in Andragology (the science of social change) at the University of Amsterdam. He specialises in computer application & development for the social sciences and in user-oriented languages & cybernetics.

Paradiso and Hack-Tic present:

THE GALACTIC HACKER PARTY

Hans HUBNER
(alias "Pengo")

(Hamburg/FRG) is a computer specialist who was recently involved in an "information transfer" with the KGB. Though the deal allegedly involved payment of DM one lakh, it is rumoured that the information transferred was entirely of public domain nature.

Peter KLERKS

(Amsterdam/NL) is a political scientist who has specialized in law and order policies, intelligence services and privacy protection in the Netherlands. He is the author of "Terreurbestrijding in Nederland" (Ravijn Publishers, 1989).

Allan LUNDALL

(Bay Area/USA) is the top American expert in the field of computer viruses. His just published book VIRUS! will be presented at the conference (to be confirmed).

Marieke NELISSEN

(Amsterdam/NL) teaches and develops computer systems for the Amsterdam Municipal Corporation, and is active in spreading computer literacy among women.

Werner PIEPER

(Lörbach/FRG) is a publisher specializing in underground books and media experiments. He is the editor of the Chaos Computer Club's "Hackerbibel I + II" (1985, 1988).

P.M.

(Zürich/CH) is an author and techno-anarchist. His books include "Weltgeist Superstar" (where Karl Marx = ET), "Tri-pura Transfer" (a post-atomic tale) and the radical utopia "Bolo'bolo" whose Dutch version will be launched at the GHP.

Patrice RIEMENS

(Amsterdam/NL) is a traveller and a geographer. He writes about development economics and modern French Philosophy.

Rolf SNIJDERS

(Utrecht/NL) is a medical biologist who specializes in brain & behaviour. He is also a communication trainer for neurolinguistic programming and an expert in the field of knowledge elicitation for expert systems.

Suzan UGURSOY

(Köln(Cologne)/FRG) heads a community association and edits "Chip Generation", a magazine for the Turkish-German youth. She is a specialist on vicious/racist computer games.

Velibor WELLER

(Amsterdam/NL) is a computer composer and musician.

SOME INFORMATION ABOUT OUR PARTICIPANTS

- Dr. Kwame BOAFO (Nairobi/Kenya) is a communication expert working with the African Council of Communication Education. He is a specialist in the field of telecommunication planning.
- Daniel DE ROULET (Genève/CH) is the author of the hacker-thriller "Ne comptez pas sur nous" (Don't count on us). He also developed, and now heads, a major medical computer system.
- John DRAPER (San Francisco/USA) is probably the best known telecommunication "expert" in hackers circles. His unauthorized "know-how" landed several times in jail. He is now working with Autodesk Inc. on computer aided design and pursues his own advanced research.
- Lee FELSENSTEIN (Berkeley/USA) has a long history of grassroots technological activism behind him and is co-founder of the famous "Community Memory" project in Berkeley. He is now in contact with the San Francisco/Moscow Teleport, a USA-USSR network system, in order to set up a shared software development computer system in these two countries. He is also presently engineering a totally new computer concept, the "Cyberpunk".
- Bernd FIX (Heidelberg/FRG) is an astro-physician and leading member of the Chaos Computer Club. He is the author of a crypto-programme and a specialist in computer-virusses.
- Dr. Cees HAMELINK (Amsterdam/NL & Nairobi/Kenya) is professor in communication science at the University of Amsterdam and the ISS in The Hague. His research focuses on power and influence in the media, hardware/software balances in communication politics, and the activities of information multinationals, especially with regard to the "Third World".
- Wau HOLLAND (Hamburg/FRG) is a reputed system developer and analyst and a keen advocate of computer-"Glasnost" in society and government. He is a leading member of the Chaos Computer Club.

Debat

m.m.v.

Prof. H. Franken,
Prof. I.S. Herschberg
Stichting Kwaad
Leven
Voorzitter:
Marieke Nelissen

Op zondag 13 november zal in Paradiso aan de Weteringschans een middag worden georganiseerd waarbij de beroemde en beruchte Chaos Computer Club centraal zal staan. Naast een demonstratie van een drietal CCC-leden en een discussie over dit Hamburgs collectief, wordt die dag tevens de Nederlandse vertaling van Das Chaos Computer Buch gepresenteerd.

De Chaos Computer Club uit Hamburg heeft in de afgelopen jaren een aardige reputatie weten op te bouwen bij de liefhebbers én de slachtoffers van het verschijnsel computerkraken. Ondanks het feit dat de CCC veel meer doet dan het inbreken in grote systemen alleen, heeft zij toch de naam van een soort moderne Robin Hood in computerland gekregen. De spectaculaire inbraak in het computersysteem van het NASA-hoofdkwartier in 1987 zal daar ongetwijfeld bij geholpen hebben. De doelstellingen en ideologiën van de CCC krijgen vaak door de opwindende rond het nieuws van deze inbraken niet de juiste aandacht. Om nu wat meer licht in de 'duistere' praktijken van de CCC te brengen, zullen op 13 november Steffen Wernery, Wau Holland, Bernd Fix en Jürgen Wieckmann in Paradiso aanwezig zijn. Zij verzorgen die dag een uitgebreide, deels audiovisuele presentatie van enkele inbraken uit het verleden en geven hierbij de achterliggende informatie over het hoe en waarom. Daarbij zal zeker ook duidelijk worden dat de CCC niet alleen uit sensatie-beluste kwajongens bestaat.

Na deze show staat de presentatie van het Chaos Computer Boek op het programma. Het boek dat in de Duitse uitgave al flink verkocht, behandelt naast enkele kraakavonturen tevens onderwerpen als kunstmatige intelligentie, privacy, virussen, en de Kunst van het programmeren. De Nederlandse primeur zal ter plekke worden verkocht.

Na deze presentatie volgt er een debat en vervolgens een openbare discussie, waarbij de 'voors en tegens' met betrekking tot de CCC centraal zullen staan. Het debat wordt geleid door Marieke Nelissen. Zij geeft computercursussen bij de gemeente Amsterdam. In het pannel zijn onder andere de professoren Herschberg en Franken en een vertegenwoordiging van de Stichting Kwaad Leven aanwezig. De middag zal worden afgesloten met de mogelijkheid tot napraten en het stellen van technische vragen aan de medewerkers van de Chaos Computer Club.

Het programma voor zondag 13 november ziet er als volgt uit:

- 11.30 uur: zaal open
- 12.00 uur: een show van de Chaos Computer Club door Wernery, Holland, Fix en Wieckmann
- 13.30 uur: presentatie van het Chaos Computer Boek
- 14.00 uur: debat met aansluitend een openbare discussie
- 15.30 uur: napraten en de mogelijkheid tot het stellen van technische vragen aan de CCC

Paradiso ligt aan de Weteringschans 6-8 te Amsterdam. Tel: 020 264521
